

## Front end Developer

### About Aviso

Aviso is the AI Compass that guides Sales and Go-to-Market teams to close more deals, accelerate revenue growth, and find their True North. Aviso delivers true revenue intelligence, nudges team-wide actions, and gives precise guidance so sellers and teams don't get lost in the fog of CRM, scattered data lakes, and human biases.

We are a global company with offices in Redwood City, San Francisco, Hyderabad, and Bangalore. Our customers are innovative leaders in their market. We are proud to count Dell, Honeywell, MongoDB, Glassdoor, Splunk, FireEye, and RingCentral as our customers, helping them drive revenue, achieve goals faster, and win in bold new frontiers. Aviso is backed by Storm Ventures, Shasta Ventures, Scale Venture Partners and leading Silicon Valley technology investors.

With our industry-leading sales performance platform fueled by data science and predictive insights, Aviso is helping enterprises accelerate their sales, optimize their sales performance and exceed their revenue goals. With a proven track record of building high growth and highly successful technology companies, our team is completely focused on solving complex sales challenges and ensuring customer success.

Aviso is seeking a Rockstar Front end Developers, to work hand-in-hand with Aviso's operations and development teams. Reporting directly to the Senior Manager UI/UX, you will be working with the founders, sales, product, and customer success teams to ensure that customers are delighted with Aviso solutions. You should be passionate about solving hard real-world enterprise problems by architecting, building and operating a highly scalable infrastructure.

### Frontend Developer roles gives you an opportunity to

- Collaborate with Product Designers, Product Managers and Software Engineers from conceptualizing new features to delivering user-friendly products
- Use the latest technologies to build new features that help our users run mission-critical sales processes
- Take ownership of full software development lifecycle: feature requirements gathering, design, architecture, implementation, debugging, testability and deployment.
- Constantly pay down technical debt, improve the software development process and refine technology roadmap

### What you bring

- At least 5+ years in front-end or full-stack software development
- Advanced level knowledge of JavaScript, CSS, and HTML5 Experience with: Vue, React, Angular or/and equivalent JavaScript frameworks

- Experience with any of the hybrid mobile development tools like Angular/Ionic, React Native, Cordova, or PhoneGap
- Proficiency with Git or other distributed version control systems
- Solid knowledge of data structures and algorithms
- B.E/BTech or higher in Computer Science or a related field from premier institutes like IIT, NIT or BITS Pilani highly preferred.

### **Aviso offers**

- Dynamic, diverse, inclusive startup environment driven by transparency and velocity
- Bright, open, sunny working environment and collaborative office space
- Convenient office locations in Redwood City, Hyderabad and Bangalore tech hubs
- Competitive salaries and company equity, and a focus on developing world class talent operations
- Comprehensive health insurance available (medical) for you and your family
- Unlimited leaves with manager approval and a 3-month paid sabbatical after 3 years of service
- CEO moonshots projects with cash awards every quarter
- Upskilling and learning support including via paid conferences, online courses, and certifications
