

Aviso is the AI compass that guides sales and go-to-market teams to close more deals, accelerate growth, and find their Revenue True North. Aviso AI delivers revenue intelligence, drives informed team-wide actions and course corrections, and gives precise guidance so sellers and teams don't get lost in the fog of CRM and augment themselves with predictive AI.

With demonstrated results across Fortune 500 companies and industry leaders such as Dell, Splunk, Nuance, Elastic, Github, and RingCentral, Aviso works at the frontier of predictive AI to help teams close more deals and drive more revenue. Aviso AI has generated 305 billion insights, analyzed \$180B in pipeline, and helped customers win \$100B in deals. Companies use Aviso to drive more revenue, achieve goals faster, and win in bold, new frontiers. By using Aviso's guided-selling tools instead of conventional CRM systems, sales teams close 20% more deals with 98%+ accuracy, and reduce spending on non-core CRM licenses by 30%.

Job description

With our industry leading sales performance platform fuelled by data science and predictive insights, Aviso is helping enterprises accelerate their sales, optimize their sales performance and exceed their revenue goals. With a proven track record of building high growth and highly successful technology companies, our team is completely focused on solving complex sales challenges and ensuring customer success.

What we're really looking for...

- 3 to 7 years' experience in using Python and PyData ecosystem for data processing, data analysis. Core Python (Python Standard Library) experience makes a lot of difference. Exposure to large volume data processing and high-performance computing is highly desirable. Must have demonstrable experience in some of the following areas:
 - PyODBC, SQLAlchemy based data acquisition, analytical processing, automation. Experience with SQL and NoSQL data bases is must.
 - Building data acquisition (ETL) and analysis pipelines using PANDAS and NumPy and related tools.
 - Experience in enhancing PANDAS code bases with pyJanitor, parallelizing PANDAS with some of the popular options like Dask, Modin etc. with experience in pipeline optimization efforts.
 - Data flow orchestration and automation using 'Apache Airflow' or 'Prefect' is highly desirable.
 - Strong focus on data testing and quality measuring using optimal logging and real time problem detection is desirable. Expertise in PyUnit and/or PyTest helps.

Good to have skills:

- Web data acquisition using crawling and scraping using BS4, Requests etc.
- API based data acquisition and processing.
- Multi-threading and Parallel processing using python parallel
- Building Data Consumption API's using python stack (Django, Flask, FastAPI etc.)
- 'Great_Expectations' based data documentation.
- Experience in Agile tools and environment

Perks

- Dynamic, diverse, inclusive startup environment driven by transparency and velocity
- Bright, open, sunny working environment and collaborative office space
- Competitive salaries and a focus on developing world class talent operations
- Comprehensive medical insurance for you and your family
- CEO moonshots projects with cash awards every quarter
- Upskilling and learning support including via paid conferences, online courses and certifications
